# STANDARD OPERATING PROCEDURES (SOPS)

# FOR RADIOLOGY (08)

Department of Health & Family Welfare, GNCTD

SOP for Radiology Ist Edition: August; 2016 Quality Assurance Cell Delhi State Health Mission Department of Health and Family Welfare Government of NCT of Delhi

**Compilation facilitated by** : State QA Cell (Nodal Officer: Dr. Monika Rana , Consultant : Ramesh Pandey , Communitization Officer : Arvind Mishra , Statistical Officer : Shahadat Hussain ), ARC (Maneesh and Md. Irshad Ansari). **Designed and Formatted by**: Graphic Designer : Mansi Rana

Sr. No.	Name	Designation	
1.	Dr. Anju Garg	Director Professor & HOD (Radiodiagnosis), Lok Nayak Hospital & Maulana Azad Medical College	Chairperson
2.	Dr. Poonam Narang	Director Professor (Radiodiagnosis), Govind Ballabh Pant Institute of Post Graduate Medical Education &Hospital	Member
3.	Dr. L R Richhele	Consultant (Radiodiagnosis) & HOD, Deen Dayal Upadhyae Hospital	Member
4.	Dr. Rashmi Dixit	Director Professor (Radiodiagnosis), Lok Nayak Hospital & Maulana Azad Medical College	Member

### This document has been prepared by the Expert Committee comprising of:

The SOPs have been prepared by a Committee of Experts and are being circulated for customization and adoption by all hospitals. These are by no means exhaustive or prescriptive. An effort has been made to document all dimensions / working aspects of common processes / procedures being implemented in provision of healthcare in different departments. This document pertains to Radiolgy. The individual hospital departments may customize / adapt / adopt the SOPs relevant to their settings and resources. The customized final SOPs prepared by the respective Departments must be approved by the Medical Director / Medical Superintendent and issued by the Head of the concerned department. HOD shall ensure that all stakeholders are trained and familiarized with the SOPs and the existing relevant technical guidelines / STGs / Manuals mentioned in the SOPs are made available to the stakeholders.

#### CONTROL OF THE DOCUMENT

The holder of the copy of this manual is responsible for maintaining it in good and safe condition and in a readily identifiable and retrievable form.

The holder of the copy of this manual shall maintain it in current status by inserting latest amendments as and when the amended versions are received.

The Manual is reviewed atleast once a year (or in between SOS if so required) and is updated as relevant to the Hospital policies and procedures.

The Authority over control of this manual is as follow:

Prepared By	Approved By	Issued By
		Quality – Nodal Officer
Name:	Medical Superintendent	
Designation : HOD /Dept. In charge	Name:	Name:
Signature:	Signature:	Signature:

The Original Procedure Manual with Signatures on the Title page is considered as "Master Copy", and the photocopies of the master copy for the distribution are considered as "Controlled Copy".

## **SOP for Radiology**

#### **Objective:**

To ensure consistently safe, effective, efficient, appropriate, & timely imaging diagnostic services to each patient visiting the hospital.

Purpose: Smooth running of radiology department to ensure uninterrupted patient service

Scope : Entire radiology department

SI.	Activity/Description	Responsibility	Ref
No.			Doc/
			Record
1.	Statutory compliance		
1.1	HOD & RSO shall be responsible for compliance to	RSO & PNDT In charge	
	AERB registration pertaining to equipment using X		
	rays in the department		
	a) eLORA registration/licensing of the		
	institution/department, RSO & all equipment		
	shall be done & maintained		
	b) Periodic QA of equipments& premises (as per		
	AERB guidelines) will be done through the		
	AMC/CMC provider and submitted to AERB.		
	c) Radiation workers will be identified & TLD		
	badge monitoring shall be done for them as per		
	AERB guidelines.		
	d) Periodic health check including blood cell count		
	& general physical examination shall be		
	conducted & recorded for all radiation workers		
	as per AERB guidelines.		
	e) Availability, maintenance, QA of all radiation		
	barriers (lead aprons, goggles, gonadal shields,		
	lead curtains)		
	<ul> <li>f) Education, training &amp; monitoring regarding radiation safety practices shall be done by RSO.</li> </ul>	Dontt Hood/Hospital DCO	
		Deptt. Head/Hospital RSO	
	<ul> <li>g) These activities will extend to Cath Labs, DSA labs, C arms in OT etc.</li> </ul>		
1.2	HoD & PNDT Nodal Officers shall be responsible for	HoD & PNDT Nodal Officer	
1.2	compliance to PCPNDT regulations pertaining to		
	US/ECHO/Doppler as well as CT & MRI equipment in		
	the in the department.		
	a) PCPNDT registration of the		

r		
	institute/department/ equipment & personnel	
	handling these equipment shall be done &	
	maintained.	
	b) Daily & monthly reporting on relevant formats	
	to competent authority shall be done.	
	c) All mandated relevant displays and signage	
	shall be maintained as per PCPNDT guidelines.	
2.	Signages	RSO/ PNDT Nodal Officer
2.1	Statutory Signages: All safety & statutory signangs &	HOD
	displays as per AERB & PCPNDT guidelines shall be	
	placed inside/outside all equipment rooms (as per	
	guidelines).	
	The displays shall be in languages & formats as per	
	guidelines.	
	For PCPNDT, copy of registration certificates &	
	display regarding non declaration of sex of fetus in	
	prescribed format, shall be done in every room	
	where USG/ ECHO equipment is installed.	
	C 2222423 2020 Hand Hand Hand Hand Hand Hand Hand Hand	
2.2	Informative signage – At the minimum following	
	information signages shall be displayed(using	
	appropriate languages, font sizes & format) at eye	
	level. The signage shall be static & permanent (i.e.,	
	no standees, posters, running scripts):	
	a) Services provided with room numbers.	
	b) Timings	
	c) Directions	
	d) Safety related education signages	
	X Ray rooms – as $(2.1)$ & $(2.3)$	
	US/Echo – as above (2.1)	
2.3	Safety signage – Radiation safety	
2.5	Radiations safety signages: Safety signage should be	
	as recommended by AERB including restrictions of	
	patient/attendant entry, hazard lights and pictorial	
	signages appropriate for radiology services (	
	Example picture given) outside of the radiation	
L		

	rooms.	
	At the minimum, following signage shall be used	
	outside all rooms where X ray, fluro, CT equipments	
	are installed.	
	and and CAUTION प्रमंग्री महिलाएं	
	not enter X-Ray Room प्रवेश न करें	
	MRI safety : Pictorial signages regarding absolute	
	contra indications to MRI. MRI Pictorial display	
	regarding absolute contraindications to MRI &	
	warnings regarding hazards associated with metallic	
	objects in MRI room.	
2.4		
2.4	Display of telephone numbers to be contacted for	
	respective safety codes e.g., code blue/code	
	red/code violet in all rooms where I/V contrast is	
	given.	
3	Equipment	HOD/Senior Technician In
		charge
	3.1 Procurement & installation of equipments shall	
	be as per government rules.	
	3.2 Operation of equipment shall be by appropriate personnel qualified & trained for	
	the specific jobs	
	3.3 Daily calibration shall be performed by the	
	operator technician at the time of switching	
	on in the morning.	
	3.4 Daily cleaning of cleanable parts of the	
	equipment shall be ensured by the operator	
	at the time of switching off.	
	3.5 Periodic maintenance (preventive) & periodic	
	calibration & QA shall be done by the service	
	engineers from the AMC/CMC provider. The	
	records shall be maintained by the Technical	
1	In charge.	
1	In charge. 3.6 Department shall maintain an equipment log	
	3.6 Department shall maintain an equipment log	
	3.6 Department shall maintain an equipment log book with information regarding all	
	3.6 Department shall maintain an equipment log book with information regarding all equipment under the following categories:	
	<ul> <li>3.6 Department shall maintain an equipment log book with information regarding all equipment under the following categories:</li> <li>a) Main Imaging Equipment - e.g., X ray, US,</li> </ul>	
	3.6 Department shall maintain an equipment log book with information regarding all equipment under the following categories:	

	b) Each unit shall be identifiable with a	
	traceability number as reflected on the	
	unit & in the log book.	
	3.7 All equipment shall have dedicated history sheet	
	where details regarding purchase, operation,	
	functionality, maintenance & breakdown shall	
	be maintained.	
	3.8 Inventory of all accessory and ancillary	
	equipment.	
4	Staff/Personnel	HOD
	4.1Availability of appropriately qualified and trained	
	staffs as per the scope of services.	
	4.2 Availability, job descriptions, rosters, leave	
	records etc shall be ensured as per	
	government guidelines/rules.	
	4.3 Appropriate numbers and mix of the following	
	staffs shall be available to provide patients	
	services for routine & emergency imaging.	
	a) Radiologists – Consultants & Resident	
	doctors	
	b) Technical Staff	
	c) Nursing staff	
	d) Ancillary staff	
	e) Data Entry Operator	
	4.4 Nursing staff may be required in the	
	department, where contrast	
	injections/sedation/invasive procedures are	
	being carried out.	
	4.5 All Staff shall be trained on respective core	
	activity & work under supervision during	
	induction period (1 week).	
	4.6 Training of all staff shall also be periodically	
	done for the following at the minimum:	
	i. BLS	
	ii. BMW waste rules	
	iii. Radiation safety	
	iv. Infection control practices	
5	Materials	HOD/Technician I/C of store
	5.1 Consumables and non consumable materials	
	required in the department shall be listed in a	
	log book e.g., -	

			1
	Consumables – Films, contrast media, signages,		
	saline, injectors etc.		
	Non Consumables – Protective devices (lead		
	aprons), cassettes, screens, grids etc		
	5.2 The procurement shall be as per government		
	rules.		
	5.3 Storage shall be in safe place with appropriate		
	environment control.		
	5.4 Appropriate stock & inventory shall be		
	maintained to prevent stock outs,		
	overstocking of slow moving items & expiry of		
	items without utilization. Good inventory		
	practices like Vital, Essential, Desirable (VED),		
	First Expiry First Out (FEFO), ABC* etc shall be		
	used.		
	5.5 Record of issuing & consumption shall be		
	maintained & periodically sent to appropriate		
	authority.		
	5.6 All instances of stock outs/non-moving		
	stocks/expired stock shall be logged &		
	analysed. It shall be reported to appropriate		
	authority & Corrective and Preventive Action		
	(CAPA) shall be suggested.		
6	Drugs & Medication		
	6.1Medication shall include the following:	Staff nurse/Technician	
	a) Contrast media – I/V – nonionic/ionic		
	b) Contrast media – oral		
	c) MR contrast media – I/V		
	d) Medicines for patients preparation e.g.,		
	buscopan, Lasix, betablockers, GTN etc		
	e) Medication for resuscitation in crash cart/		
	Emergency Tray		
	f) Medicines for sedation/anesthesia		
	g) Gases – piped gases, oxygen		
	cylinders/nitrous oxide cylinder		
	6.2 Procurement shall be as per government rules		
	6.3 Storage shall be in safe place with appropriate		
	environment control.		
	Appropriate stock & inventory shall be		
	maintained to prevent, stock outs, overstocking		
	of slow moving items & expiry of items without		
	utilization. Good inventory practices like Vital,		

	Essential, Desirable (VED), First Expiry First Out	
	(FEFO), ABC* etc shall be used.	
	6.4 Record of issuing & consumption shall be	
	maintained & periodically sent to appropriate	
	authority.	
	6.5 All instances of stock outs/non-moving	
	stocks/expired stock shall be logged & analysed.	
	It shall be reported to appropriate authority &	
	CAPA shall be suggested.	
7	Patient workflow protocol	
	Arrival of patient in radiology department:	Deptt. Staff/ Technician
	7.1 A central reception/help desk will	
	register/schedule the patient for imaging as	
	per the request form.	
	7.2 Transport of patient from OPD/ IPD shall be	
	the responsibility of the sender department.	
	7.3 One trolley & wheel chair shall be available in	
	the department to shift a critical patient to	
	ICU/ward, in case of an adverse event.	
	7.4 Central reception/help desk shall be	
	responsible for providing the following	
	information the to the patients –	
	a) Date & time of imaging	
	b) Preparation like NPO, full bladder etc.	
	c) List of items like towel/water bottle etc to	
	be brought.	
	d) Any patient coming for imaging requiring	
	contrast injection/sedation/intervention	
	shall be instructed to be accompanied by	
	a responsible adult/next of kin.	
	e) Case of queries regarding routine	
	medication shall be addressed	
	by/referred to available	
	radiologist/doctor in the department.	
	f) Method and time for collection of report	
8	Appropriateness/justification:	Radiologist
0	8.1 All imaging request forms will be duly filled by	
	the referring clinician, with appropriate	
	indication & clinical details, details of previous	
	imaging, provisional diagnosis, current clinical	
	questions (if relevant)	
	8.2 These details shall be verified by a radiologists	
	before scheduling the study.	

	8.3 Current best practices, availability of equipment	
	and patient safety shall be kept in mind while	
	choosing the appropriate imaging for a	
	particular clinical situation.	
	8.4 In case the imaging request is found	
	unjustified/unsafe/unavailable, further	
	clarification shall be sought from the referring	
	doctor before accepting it.	
	8.5The above shall be re-verified on the day of	
	imaging by the radiologist on duty at	
	respective imaging stations.	
9	Scheduling	
	9.1 Scheduling shall be done on first come first	
	scheduled basis taking into account the	
	capability of the imaging services.	
	9.2 Priority slots shall be kept for Emergent and	
	Urgent studies, Indoor patients, Intensive care	
	patients.	
	9.3 Pediatric patients, senior citizens, other	
	vulnerable patients, and patients on certain	
	medication (e.g., Diabetics) shall be prioritized	
	on the day of study by the operator in-charge.	
10	Patient Information	Staff nurse/technician
	10.1 Instructions regarding NPO/ Full Bladder etc.	
	Accompanying person shall be given in	
	writing, at the time of scheduling	
	10.2 All the details of the procedure will be	
	explained to the patient by the staff nurse or	
	technician.	
	10.3 Prior to imaging radiologist shall confirm that	
	10.3 Prior to imaging radiologist shall confirm that	
	informed consent has been taken.	
	informed consent has been taken. 10.4 Information about report collection shall be	
	informed consent has been taken. 10.4 Information about report collection shall be given at the time of imaging. Help desk	
	informed consent has been taken. 10.4 Information about report collection shall be given at the time of imaging. Help desk reception also shall be empowered to provide

	formal <b>Informed consent</b> will be documented.	
	11.2 The Consent will document the indications,	
	benefits, risks and possible alternatives to the	
	proposed procedure.	
	11.3 It will be signed and dated by the Radiologist,	
	Patient/guardian and an impartial witness.	
	11.4 Pre entry risk assessment checklist can be	
	included in the consent format.	
12	Pre-entry safety check/risk assessment:	
	12.1 For X-ray/plain CT , last menstrual period (LMP)	
	shall be ascertained, and documented,	
	wherever appropriate to ensure that	
	unnecessary radiation exposure is not given to	
	pregnant women.	
	12.2 For contrast injection, a check list containing	
	history of allergy, HT, DM, renal disease,	
	cardiac disease, asthma, must be checked &	
	documented; preferably as a part of consent.	
	Recent Serum creatinine levels shall be	
	documented to screen for renal dysfunction.	
	12.3 For MRI a checklist containing risk of pace	
	maker, magnetic material i.e., any operative	
	iatrogenic implants (cochlea implant,	
	orthopedic implant, aneurysm clip etc) must	
	be checked & documented.	
	12.4 For invasive/intervention procedures INR must	
	be checked & documented in addition to risk	
	of contrast, as part of consent.	
	12.5 Separate consent shall be taken for sedation.	
13	Patient Identification	
	13.1 Correct patient must be identified for correct	Technician/Radiologist/
	procedure at the time of performing the	Nurse
	procedure, compiling the report and during	
	dispatch of report. At least two identifiers	
	shall be used to identify correct patient, one	
	of which shall be UHID number.	
	13.2 At the time of imaging , correct patient for	
	correct imaging of correct side/site shall be	
	ensured by the technician/radiologist	
	performing the imaging.	Radiologist/technician
	13.3 All images will be appropriately labeled for	
	<b>U F F F F F F F F F F</b>	

patient ID, side marker & date of examination. 13.4 At the time of compiling the report, patient ID shall be verified by the radiologist on the	
shall be verified by the radiologist on the	
envelope, request form, imaging films &	
reports.	
13.5At the time of report dispatch, the	
technician/dispatch desk person shall ensure	
correct report for correct patient by using at	
least 2 identifiers.	
14 Patient preparation:	
14.1 Removal of metallic artifacts, change ofNurse/technician	
clothing, wherever required.	
14.2For ultrasound, change of clothing, filling or	
emptying of bladder wherever required.	
14.3 For CT, change of clothing, removal of metallic	
articles wherever required.	
14.4 For MRI, change of clothing, removal of	
metallic, magnetizable artifacts.	
14.5 Oral contrast water/air, rectal	
contrast/water/air, IV line wherever	
appropriate	
15 Performance of the procedure:	
15.1 Procedure for taking plain X ray	
a) For most x-ray examinations(except x-ray of	
abdomen& spine) no special preparation	
is required.	
b) As with most other imaging procedures,	
jewelry and other metallic articles should	
be removed and handed over to the	
accompanying person.	
c) Patient is appropriately positioned and	
asked to hold breath/ be still while film is	
exposed.	
15.2 Performing Barium studiesTechnician/Radiologist/	
15.2 Performing Barium studiesTechnician/Radiologist/a) NPOReporting Nurse	
a) NPO Reporting Nurse	
a) NPO Reporting Nurse b)Preparation as advised at the time of	
a) NPO b)Preparation as advised at the time of booking depending on area to be	
a) NPO b)Preparation as advised at the time of booking depending on area to be examined.	

		1
	appropriate to examination.	
	<ul> <li>e) Patient appropriately positioned &amp; images</li> </ul>	
	taken, keeping ALARA principle in mind.	
15	.3 Performing Urographic examinations	Technician/Radiologist/
	a), b) & c) as above.	Reporting Nurse
	d) informed consent as above of no.11	
	e) IV line cannulation for injection of	
	appropriate amount of contrast.	
	<ul><li>f) Patient appropriately positioned &amp; images</li></ul>	
	taken, keeping ALARA principle in mind.	
15	.4 Performing USG/Doppler	Radiologist/Nurse
	a) Patient arrives as scheduled with full	
	bladder for pelvic area and NPO for	
	abdominal examination.	
	b) Radiologist performs the scan using	
	appropriate transducer with assistance of	
	staff nurse.	
	c) Observations recorded and report	
	generated by Radiologist.	
15	.5 Performing CT Scan	Technician/Radiologist/
	a) Patient arrives as scheduled with	Reporting Nurse
	requisition form & preadvised	
	preparation.	
	b) Can be contrast or non contrast	
	examination	
	c) For contrast examination-informed consent	
	as above	
	d) All metallic objects removed from area of	
	interest.	
	e) Patient positioned for area to be examined	
	f) IV contrast is injected in appropriate	
	quantity.	
	g) Scanning is to be done choosing	
	appropriate protocol as per indication	
	h) Post processing of acquired images.	
	i) Filming in soft tissue, lung, bone window as	
	appropriate in minimum of films in all	
	requisite information.	
	j) Reporting by Radiologist.	
	-	

	15.6 Performing MRI Scan	Technician	
	a), b)& c) same as CT Scan		
	d)contraindications to be checked		
	<ul> <li>e) Patient positioned for area to be examined.</li> </ul>		
	f) IV contrast if required		
	g) Post contrast acquisition.		
	h) Post processing if required.		
	i) Filming of required sequences		
	j) Reporting by Radiologist.		
	15.7 Performing interventions		
	<ul> <li>a) Ensure availability of attendant /referring doctor</li> </ul>		
	<ul> <li>b) Proper procedure risk assessment &amp; investigation as appropriate (BT/CT/INR etc)</li> </ul>		
	c) All aseptic precautions to be taken		
	<ul> <li>d) Universal precaution to be followed all the time</li> </ul>		
	e) Done under USG/Fluoro/CT guidance		
	<ul> <li>f) Proper labeling and identification of sample</li> </ul>		
	<ul> <li>g) Appropriate dispatch of collected samples to be ensured by sister/radiologist to referring</li> </ul>		
	department/concerned lab.		
	<ul> <li>h) Patient to be monitored post procedure as required.</li> </ul>		
	i) Inform patient regarding report collection		
16	Radiation protection:		
	16.1 AERB guidelines and ALARA principle will be	Technician/Radiologist	
	followed for all radiation exposures		
	16.2Patient Protection: Appropriate imaging,		
	ascertaining pregnancy status of female		
	patients, use of gonadal covers/lead shields		
	wherever appropriate, use of low dose		
	exposures, especially for children.		
	16.3Staff protection: Appropriate rosters/rotation	Technician & RSO	
	of technical staff from radiation to non-		
	radiation areas. Provision of radiation		
	protection barriers/ lead apron/ thyroid		
	shield, lead goggles/ gonadal shields wherever		
	appropriate.		

	Provision of TLD badges for monitoring of radiation exposures. Radiation workers shall mandatorily be wearing the		
	, C		
	TLD badges during working hours.		
	16.4Leakage surveys of installation sites of all		
	radiation equipment to ensure that staff,		
	patient &visitors to the department are		
	protected. Entry to radiation rooms shall be		
	restricted by suitable signages and red light.		
	Attendants assisting the patient shall be		
	preferably males. Female attendants shall be		
	screened for pregnancy status.		
17	Processing films/ images		
	17.1 After exposure and completion of procedure,		
	films will be processed by the available		
	methods.		
	Wet processing is discouraged. If still in use,		
	the technician/ dark room assistant will		
	ensure availability of required solutions at		
	appropriate concentration & temperature,		
	every day. Maintenance of automatic		
	processor.		
	17.2 Dry view /laser/computer methods of image		
	processing are preferred. The choice will		
	depend on the daily throughputs.		
	17.3 The images will be checked for quality, patient		
	identity, and urgency of reporting, at the time		
	of compiling them for reporting in respective		
	envelopes.		
	17.4 The technician in charge shall ensure that		
	these envelopes shall reach the reporting		
	station in separate piles for 'urgent' &		
	'routine'.		
	17.5 Processing of CT/MRI images shall be done by		
	the radiologist to ensure that all findings and		
	regions are represented on the films with		
	appropriate annotations wherever necessary.		
18	Report compilation:	Radiologist	
	18.1 Radiologist will ensure compilation of an 'in	č	

	context' report taking into consideration the	
	clinical details provided by the referring	
	clinicians.	
	18.2 Patient identity will be checked by the	
	radiologist while compiling the report.	
	18.3 Quality of X ray/ other images will be ensured	
	to be of diagnostic value. Repeat scans will be	
	ordered if deemed necessary.	
	18.4 The timeline of reporting will be adhered to, as	
	per the defined turn around time by the	
	department.	
	18.5 Turn around time for the report: The	
	department/hospitals shall be required to	
	define the turn around time of the radiology	
	reports in two categories for each modalities	
	-	
	a) Routine report (not more than 48 hours)	
	b) Urgent (not more than 6 hours)	
	Emergency report will also be intimated to the	
	treating physician verbally/telephonically.	
	18.6 The contents of the report shall include the	
	following, at the minimum	
	a) Patient identification	
	b) Type of study, region, projection	
	c) Whether any I/V contrast/oral contrast	
	given. Please indicate the name, dose,	
	rate of contrast & whether any adverse	
	events (AE) occurred.	
	d) Details of any medical	
	preparation/sedation, if given.	
	e) Salient findings (positive & negative)	
	f) Provisional diagnosis	
	g) Differential diagnosis	
	h) Follow up advice, if any.
